VARIETIES

A) Brownfield Tokolyi Cosford (TBC)

Pollinizers - early – Barcelona (blue).
- mid - Turkish Cosford (red)
- late – Paskas Late (green stripe)

B) Barcelona

Pollinizers - early – Segorbe (yellow)
- mid TBC (grey) & Turkish Cosford (red)
- late – Halls Giant (white), Paskas Late (stripe)

The periods of Pollination shed is described relative to the period of female flowering of the main crop variety.

1. Freight, packaging (and plant certification costs - WA and TAS) are additional.
2. We start lifting whips only when they are fully dormant usually early July. They should be planted by end of August. Whips are supplied bare rooted, with roots packed in moist sawdust or water crystals for transport.
3. Our pollinizers are individually tagged with coloured tape to identify variety. Main-crop whips are colour tagged by the bundle. We will supply a Pollinizer Placement Grid when the order is supplied.
4. Our standard Pollinizer Placement Plan is based on 6 m between rows and 3 m between trees (approx 555 plants/ha). It has two rows of main crop, then a row interspersed with pollinizers. We will customise the plan to your site and your required row and tree spacings.
5. To assist with site planning and pollinizer placement, growers should supply a sketch map of the orchard site or hedgerow showing:- dimensions of planted area in metres; location of roads and headlands; N.S.E. and W., orientation of rows, irrigation mains and laterals; highest and lowest points, direction of slope, natural protection or wind-breaks, and direction of prevailing summer and winter winds.

Whip Prices Winter 2012

First Year Whips - $9.00 plus GST **Grown on a year - $11.00 plus GST**
